The Presidential Election 2016 in the USA marks a historical event and as well as for the planets' tendencies during the year 2016-2017. This is an exciting day for me to look at some of the planets and share their overall main influences.

Cancer is the ascendant ruling the personality and the drive of the whole country just as when it was born on the Independence Day back in the 4th of July 1776. Cancer is the mother of the zodiac. This year, citizens will feel the need to protect the land during the historical election.

The citizens of the United States of America are voting and participating in this election with the same inner drive as they had back in time. There is a strong fiery of desire for change. There are four planets influencing minds. This means high level of intellect however, this intellect is clouded by emotions. Some people are in line to close cycles, but they are faced by resistance to new laws and changes.

Let's see only some of most remarkable influences.

Transformations in the USA July 4, 2016 till July 4, 2017.

Transformations and rebirth are necessary for a better future and this year it is shown in the area of Virgo. Virgo in the zodiac represents, the accountant. Everything related to contract services, stock market, saving bonds and inner health and circulatory underground systems such underground rivers or volcanic lava will undergo transformation on US land.

Pluto is the planet occupying this area. It is small planet, yet powerful. It is capable of stirring things up, such as secrets of the current government or people in power. They will be inevitably healed and cleaned.

The strongest influence on the USA is going to be as important and long lasting changes, similar to when George Washington became the Commander in Chief during the American Revolutionary War. Important because he became the first and only nonpartisan President of the United States and long lasting transformation similar to when he established many precedents still in use today, such as the cabinet system, the inaugural address, and the title, "Mr. President".

U.S.A Chart for the Year 2016-2017

Some news regarding hidden money or important paperwork are going to come to the light and shine with the nature of unexpected or unintended. It is something that just take life by itself. It is important to say that surprises brought up to the surface by Pluto arise to be fixed, because it is the right moment and the right people are going to be in the right places to help to fix it, because if it doesn't, it will not be solved in the future.

While the area of finances, services and accountant is being stirred up by Pluto, this planet as an opposition aspect to the Sun or the inner heart of the populations. This means if these news or transformations are not handle well or people in power get distracted by the shocking news, it can affect financial corporations and the stock market. Money can be lost if extra attention is not placed upon reading the fine print.

Planets are tools to help us to see a possible path. Long lasting economic benefits to the USA such a hidden treasure, new oil rigs can be found in unexpected areas of the country. Renewal of contracts, contract with a foreign country. Such contracts can be regarding a brand investor for health rehabilitation, a new health system or oil related contract.

This year the old health system will come to die for a new health system is going to take place. Possibly two important health systems with beneficial options. The nature of Pluto is death. Something have to die for a new transformation to take place. Transformation will occur. There will be a transformation regardless of the elected president.

The USA State of Mind

The United State of America was born under the zodiac sign of Cancer and with its ascendant Cancer. Cancer is the mother of the zodiac and its nature is to be protective. It is the reason why the US is seen as the land where other countries find shelter. Cancer on the other hand, just like the crab by the sea hides its pain and weakness in its shell. It grieves by silently retrieving in the water. This being said is applied to the USA citizens' state of mind.

The ascendant is located in the mind of the chart or map of the USA. The mind of the citizens this year is full of mixed emotions. The sign of Leo is presented in the physical area which is interpreted as the citizens of this country are going to growl loudly, like a lion trying to defend its point of view. Some will react like the lion roar, sounding menacing. Others will take a passive aggressive position, sitting down, but ready to pounce and strike. Emotions run high as everyone mindset is on protection mode, as the lion defending its family.

Both influences, Cancer and Leo have a problem they hide their emotions deeply. When emotions are not dealt with there is a high tendency for chaos. People will protest violently. This influence will be weak in the following days after the election. But it does show a strong influence during the following months after the elections.

These two signs can be utilized in beneficial ways. The real estate business is going to be on the spot light this year. Contracts that are read carefully and proper planning will layout possible rise in home ownership throughout the nation. This will peak and best in 2017.

Terrorist Attack on the heart of the land.

It is important to watch for the heart of the country it could be New York or Washington DC for any terrorist attack. Some consider New York as the heart of the USA or based on the United States Independence date, it could be Washington DC. The warrior planet Mars is present all this year in the house of Leo and very close to where an authority figure lives.

Possible death of an elder authority person most likely an ex-president.

A new government direction.

This year the government will take a sudden change of direction of its regular work. An unexpected event will turn the government to pay attention and change foreign policies that is going to be seeing with hope and confidence. Even though this change looks like it is motivated by a sudden hidden attack to the heart of the country, either physical or cybernetic attack, it is actually part of the deep transformations the nation is under this year.

New policies regarding the world wide net strong position will be placed to protect the country. Drastic and new immigration laws. There is a young figure influencing these decisions and they are impulsive. Therefore more strategic planning, thought and training to control impulsive decisions is recommended.

Uranus, the planet of new and unexpected events located in this area of jobs and goals. It indicates sudden changes. The energy of this planet is constructive, not very popular because changes can be scary for people, but if handle well it is what the country needs for the transformation process. The establishment of new ideas, ability to spot future trends. It can also lighten up the seriousness of Capricorn, the sign where it is located.

Large part of the citizens refuse to close the cycles that need to be closed. Uranus has a square position with the planet of transformations like two boxers on the fighting ring the executive branch and the legislative branch show some resistance and fighting back regarding the transformations and the new ideas can also be affected by what will be found in the finance area because of the presence of Pluto.

This could represent sudden loss in the stock market, massive contract terminations and change of budget over governmental institutions.

Justice Area

The Supreme Court of Justice is trying its best to be fair and equal to all, new ideas or amendments to the constitution might take place. There is a resistance about to change the right to bear guns.

Sad feelings about a woman in higher position who got critically ill or died either a judge or a lawyer.

Many subjects and laws are going to be reviewed for change, because of an unexpected event.
